Federal Election Commission Washington, D.C. 20463 Attention: Mark T. Kim

RE: Response to MUR 4012

I have been involved with various campaign's since the early 80's. I am aware of many campaign laws and to my knowledge have never violated any nor been named in any complaints. My duties have included maintaining mailing lists, mailings, delivering signs and literature, bookkeeping and developing position papers and flyers.

I find this complaint ludicrous. I spent months working in my brothers campaign. Myself and others spent over two weeks researching and formatting our 11 x 17 (major) flyer. Lesser amounts of time were spent creating one page flyers on various issues and topics. I also helped distribute Lewis for Congress campaign materials. Richard made it abundantly clear to his volunteer staff that they could not hand out or encourage others to hand out materials not paid for by the Lewis for Congress Committee and printed with the Lewis for Congress disclaimer. At staff meetings, the Candidate remarked many times that he thought Dr. Simon's flyers did him more harm than good.

I was present when Faith Mercke, an Executive Member of the Republican Party, came to my brother's office outraged by mail being sent by Dr. Frank Simon. She made accusations that my brother was either involved in a conspiracy with Dr. Simon's organization to defeat Susan Stokes or that he was to stupid to recognize that he was being used by Dr. Simon. Faith said that Richard was just going to cost Susan the election and that he could not possibly win. She showed Richard a flyer mailed by Dr. Simon and identified it as the same flyer spoken of on the Jane Norris Radio program by Debbie (Tapes of that program are available). Faith acknowledged that Debbie was caught in a lie on the air. Debbie originally claimed Richard had handed her one of Dr. Simon's flyers, but later in the program acknowledged she had received it by mail. Before Faith left she made the threat that a complaint would be filed.

Sincerely,

Doug Lewis

EASTERN BRIDGE

"In questions of power, let us hear no more of trust in men, but rather bind them down from mischief with the chains of the Constitution." (Thomas Jefferson)

The American way of life is at risk. The information included in this flyer could be the most important information you have ever received from a candidate for public office!

- . WHAT IS THE BASIS OF U.S. MONEY?
- CAN AMERICANS OWN PROPERTY?
- Is THE NATION'S DEBT PROMOTING ONE-WORLD GOVERNMENT?
- Is HEALTH CARE REFORM A RUSE TO FINANCE

Your republic will be as fearfully plundered and laid waste by barbarians in the 20th century as the Roman Empire was in the fifth with this difference: the Huns and the Vandals will have been engendered within your country by your own institutions."
(British historian Lord Macauley -1857)

THE NATIONAL DEBT & HEALTH CARE REFORM

Could you buy \$1.89 worth of groceries with each \$1 that you earn? For 54 of the last 60 years, Congress has spent more than it collected in taxes. Nothing has changed under Clinton that would reduce the debt! In 1992, the federal government paid out \$1.89 for every dollar of taxes collected.

Overspending No Longer Works

In the economy of the early 1960's, when the government spent a dollar, \$27 in growth in the economy resulted. But spending tomorrow to pay for the present time inevitably passes. By the end of the Bush adminis-

tration, a deficit dollar resulted in less than 40° growth.

The accumulation of deficit budgets has resulted in nearly \$5 trillion dollars of government debt. Unfunded financial obligations for Social Security, government and military ratirement, and other programs amount to an additional \$12 trillion dollars. Dividing the nation's debt by the G.N.P., America owes \$3 of every \$4 produced in the economy.

The impact of debt on our lives

When governments have difficulty borrowing money they can devalue their money to make bonds easier to sell. Or they can raise interest rates above what other countries offer. As a result, the dollar has been on a trend of ever decreasing real value.

Outrageous taxes mean that today, the average imily pays more in taxes than for food, clothing, and relter combined. "Tax Free Day" is now July 3rd--we work until then to pay federal, state, local, and F.I.C.A.. The politicians are spending more of our income than

Outrageous taxes deplete the capital available to private business to expand and create real jobs

Outrageous taxes devalue the dollar, making houses, cars, gasoline, etc. more expensive.

Outrageous taxes raise interest rate, s meaning

higher monthly car and mortgage payments, fewer housing starts, and fewer auto sales followed by loss of

Outrageous taxes mean individual savings for retirement needs are devalued. What will your savings be

Outrageous taxes mean the federal budget and our international trade deficits limit our ability to allocate more of our national income to health care

Socialized Health Care Is The Problem

Nearly 85% of America's citizens have been insured the past 20 years. The so-called health care crisis is not about how many Americans are insured, but <u>how</u> they are insured. Private health plans have been losing customers to government plans for years. Private health promiums now represent only 26% of America's health costs. Taxpayer-supported government plans now pay 51% of the nation's health bills, and 20% of the nation's health costs are paid by patients in cash or co-payments. The remaining 3% is categorized as other private health costs. Private health plans are running out of customers, the government is running out of money, and more citizens are becoming eligible for government health plans every year.

Health Plan Bailout

Health reform -- mandated coverage -- was recognized by both parties as a means of raising taxes and forcing the sale of billions of dollars of new government bonds to health insurers. The government would borrow money from insurers in return for providing 37 million new policy premiums. Citizens and business would be forced to pay interest to insurance companies for loaning a portion of every American's insurance premiums to our government. In summary, nationalizing health care would resort to double taxation under the guise of free enterprise. It is an act of financial desperation!

Foreign Credit Dependency

Americans are not encouraged to save by our tax

laws. That must change!

In the Congressional Record for March 18, 1994, on page H1545, Congressman Gonzalez stated, "Just up until not too long ago, the Japanese had about 35 percent ownership of our Treasury, of our debt." (Emphasis added)

How can a foreign nation own part of our Treasury? Since the Gold Reserve Act of 1932, "The money will be worth one hundred cents on the dollar, because it is backed by the credit of the nation. It will represent a mortgage on all the homes and other property for all the people in the nation..." (Congressional Record-House, March 9, 1933)

"As a result of this, the ultimate ownership of all property is in the state; individual so-called 'ownership' is only by virtue of government, i.e. low 'owner' amounting to mere user, and the use must be in accordance with the law and subordinate to the necessities of the State." (Senate document #43, 1933)

In 1948, the U.S. produced 44% of the world's products. America now produces less than 22% of the world's goods. The problem is the American dollar still represents approximately 65% of the world's money supply

The European Economic community is becoming a reality. When they adopt a unified currency and ce to use the dollar as the world standard, the dollar will free

fall and lose much of its purchasing power. Inflation is the bane of the bond market, and U.S. Presidents do everything possible to avoid it. If inflation gets out of control, as it did in the Carter years, it would act as a multiplier on interest due on the nation's debt. It would not leave enough money to operate government at current tax and spending levels.

IS OUR SOVEREIGNTY BEING THREATENED?

Sovereignty is to a nation what personal freedom is to the individual! Foreign money has strings-will Congress sell America into bondage?

Congress will soon vote on membership in the World Trade Organization. Labeled an Executive Agreement, a simple majority in both houses can pass it, circumventing Constitutional requirements that treaties be ratified by a two-thirds majority in the Senate.

The U.S. and 116 other nations would have one rote each and no veto. Congress would have to change vote occinate no vero. Congress would have to change laws affecting trade, investment, jobs, productivity, and labor standards to comply with W.T.O. standards administered by un-elected bureaucrats in Geneva. Decisions would have the force of international law and we would have to abide by them.
The estimated cost of U.S. membership is \$40 billion

over ten years. The Clinton administration is considering adding the cost onto the national debt.

In the 1940's President Truman and the U.S. Senate said no to the similar International Trade Organization, concluding it would diminish U.S. sovereignty and inte fere with U.S. domestic laws. The same reasons apply

today.
The following excerpts from a little-known Depart-

ment of State Publication 7727 (published early in the Kennedy administration) should be considered a worning to all who understand the nature of government: The manufacture of armaments would be prohibited except for those of agreed types and quantities to be used by the United Nations' Peace Force and those require maintain internal order. (DoS #7277, p. 10, emphasis

"There shall be established observation posts at such locations as major ports, railways centers, motor highways and air bases (p.16)

...no state would have the military power to challenge the progressively strengthened U.N. Peace force. States would retain only those forces, non-nuclear armaments, and establishments required for the purpose of

maintaining internal order. (p. 19)

<u>U.N. Control of U.S. Military</u>

President Clinton has issued a Presidential Decision Directive, PDD-25, "to place U.S. forces under the operational control of a foreign commander." Not even Congress knows its content because it has been classified. Former Chairman of the Joint Chiefs, Gen. Colin Powell, inserted three provisions in an earlier version to protect U.S. troops, but Clinton removed Powell's provisions after the general retired.

Powell's version would have permitted U.S. commanders to refuse orders:

- outside the scope of the mission
- illegal under our law
- inadvisable or ill-conceived

A HISTORICAL PERSPECTIVE ON THE RIGHT TO BEAR ARMS

George Washington -- "Government is not reason, it is not eloquence, it is force! Like fire, it is a dangerous servant and a fearful master."

V.I. Lenin -- "Cause the registration of all firearms on ome pretext, with a view to confiscating them and

leaving the population helpless." Adolph Hitler, 1935 -- "This year will go down in history. For the first time, a civilized nation has full gun registration! Our streets will be safer, our police more efficient, and the world will follow our lead into the

ps Jefferson -- "In questions of power, let us hear no more of trust in men, but rather bind them down from mischief with the chains of the Constitution."

PROBLEMS:

There is clearly an assault on this nation's sovereignty and rights and liberties guaranteed to us by our Constitution and the Bill of Rights! This is brought on by the impending financial failure...results from years of

liberal social programs and bloated corrupt government.

*** U.S. Troops under authority of the U.N. *** Efforts underway to call a Constitutional Convention (How does anyone propose to change our Constitution and why hasn't the public been told?) *** A federal I.D. Card to be required for dealing with any government agency including the I.R.S. (the ultimate invasion of privacy) *** Senate Bill 2158 deals with a dual dollar! (Some believe this is an admission of bankruptcy) *** The United Nation's Convention on the Child, guaranteeing children freedom of association and the right to review or read anything they wish. Parents would no longer have a voice concerning playmates or reading material.

*** Health Reform Bond Deception *** Special legal status based on sexual preference and gays in our military *** Erosion of Second Amendment rights (gun control) *** Illegal searches and seizures without warrants in Chicago and elsewhere *** E.E.O.C. proposals to eliminate religion from the work place including all jewelry with religious significance *** 550
Emergency War Powers available to the president providing dictatorial power to the president for emergencies of his choosing including financial failures *** Fiat currency based on a mortgage on all of America's assets A legal system that produces more than 80% of the entire world's lawsuits. Américan business insurance costs are much higher than the rest of the world. This drives the high-tech jobs, research, and development out of our country! *** Taxing the tobacco industry out of existence will destroy

ANSWERS:

It is time to face facts! America is running out of money. Relying on foreign credit threatens our future and our sovereignty. We must choose a direction! The Federal government must be downsized. There are too many laws intruding into our lives, freedoms and opportunities. We must return to our Constitutional foundations.

 We need to pass the A to Z Bill and the Armey 17% Flat Tax Bill.
 We need to provide line-item veto power to the President. • We need to expand the McCarran Ferguson Act to allow doctors and hospitals to share CAT scans and other expensive capital equipment to reduce medical costs. • Tax credits for individual purchase of health plans should be provided. • We need to make it possible for employees who need full-time employment to be hired instead of trapped in part-time employment because of benefit laws. We must recognize that the additional income from full employment could purchase the health benefit! • We need to increase family tax exemptions for children to reflect reduced real income of struggling young families. • We must overhaul our legal system which has resulted in the world's most expensive product and professional insurance costs. America represents only 5% of the world's expulation; it is ridiculous that we have over 80% of the entire world's law suits. The President and his wife, both lawyers, admit they cannot afford the lawsuits facing each of them now! • We must down-size the Federal government as required by the Tenth Amendment in recognition that states' and citizens' rights have been violated... no more unfunded Federal mandates raiding states balanced budgets. • We must not allow unlawful search and seizure of property. • We must insist all trade agreements be beneficial to the United States and in no way compromise our sovereignty. • We must reverse Presidential Directive #25. American troops must remain under the authority of American commanders.

WHAT RICHARD LEWIS BELIEVES WE NEED NOW! STATES' RIGHTS

America must return to moral and financial principles...our Constitutional foundations

more jobs and result in the loss of more family farms.

Pending Legislation

- T Cut Taxes Today, the average family pays more in taxes than for food, dothing and shelter combined. Dick Armey's H.R. 4585, the Freedom and Fairness Restoration Act, would tax personal income and business profits at a flat 13 for are and simplify reporting for individuals so they could file on an index card.
- √ Passage of H.R. 3266, the A to Z spending cuts, would change the Congressional budget process and make members accountable for the tax dollars they seem!
- The Deficit Reduction Lock-Box Bill, sponsored by Charles Schumer and Michael Crapo -- would guarantee that spending cuts reduce the deficit instead of being transferred to other government programs.
- [v] Congress must veto immediately membership of the United States in the World Trade Organization.
- The Digital Telephony Act must be defeated! Big Brother wants to listen in -- this bill would require telephone companies to install special equipment to help the government monitor telephone calls and faxes of American citi-
- Congress needs to pass H.R. 3627, the Cantwell Bill, to encourage the electronic industry to create and self products that ensure any and all private communications.

Needed Legislation

- American troops must remain under the authority of American commanders. PDO-25 should be declassified, published and overturned!
- ☐ The U.N. Resolution on the Rights of the Child must be repealed! The President and members of both parties have identified the demise of the nuclear family as being responsible for the soaring teen crime rate. Then they passed a resolution that denies parents authority to tell their children who they may associate with and what they may view or read!
- The only possible explanation is a morally bankrupt Congress hell-bent on internationalizing Americal

☑ Legislation providing the President a line-item veto is necessary. President Reagan said, "If Congress can't bring itself to do what's right, they should at least give me what forty-three governors already have — a line-item veto. Then I'll make cuts; I'll take the responsibility, and the heat and I'll enjoy it.

A Balanced Budget Amendment.

Other Concerns

- Although the media has not reported it, America may saan hold a Constitutional Convention. Thirty-two state legislatures have signed on and only two more are required. For what purpose are the states requesting a CON-CON and why has the news media been silent?
- Senote Bill 2158 the dual dollar. Two different colored \$100 bills will be printed – one for internal use and one for use overseas...supposedly to hinder drug money laundering. Is this really an admission of national bankruptcy?
- Illegal search and seizures in Chicago and elsewhere.
- A proposed National LD. Card showing your social security number, photograph, and fingerprints tied to a government data-base...under the excuse of curbing illegal immigrants.
- Goals 2000 -- further infringement on the rights of the states to make their determination on how best to provide sublic education.

The Federal Government is broke and deeply in debtyet it sees the balanced budgets of most states as a means of continuing to extend its power over citizens lives.

Provisions of the Crime Bill are the most recent example. The Federal Government will pravide the states with money for additional police officers and prisons...but there are strings. After five years the state must assume funding to maintain the new police officers and prisons or face federal penalties.

The money from Uncle Sam is supposed to provide for 100,000 new policemen...but given average wages of new patrolmen, only 20,000 are actually funded.

State legislators want their share of the federal pie. But

State legislators want their share of the federal pie. But if Washington has a surplus of tax money to return to the states, federal taxes should be reduced and the money left in the states. State legislators are more in touch with the political will of their constituents and what their state can or cannot afford. Or Lord forbid, taxpayers might have more money for discretionary spending.

Law enforcement, supervision of public education and regulation of the insurance industry are the prerogative of the states.

Five states have already signed resolutions informing the Federal Government that they will not accept any more mandated but unfunded legislation from the U.S. Congress as binding on their states. Among these are Missouri, Hawaii and Illinois.

Other state legislators, including several in Kentucky, are considering similar resolutions to curb federal encroachment on states' rights and budgets.

THE CANDIDATE'S POSITIONS ON THE ENVIRONMENT

Government regulations on the environment have reached a state where bureaucratic rules are based on socialist dreams rather than science or common sense.

- On Ozone Depletion in the upper atmosphere, a scientific report by Dr.'s John J. Mcketta and I.W. Tucker, "Clean Air (1982)- A Perspective," showed that "...present ambient air standards are more than adequate to protect human health." Yet ENVIROCRATS have pushed standards be-
- yand reason since 1982.

 "...the law to clean up thousands of Polluted Sites across the nation has been a bonanza...the Rand Corporation estimates that 40¢ of every dollar spent on cleanup of toxic waste goes into lawyers' fees and legal costs..." (Washington Times, 7/13/94)
- On "Earth Warming" reports, all available science shows that average earth temperatures have not changed signifi-

cantly in the past 100 years.

 Auto pollution controls and auto testing in the Louisville area is a farcal. "The New American" (5/17/93) presented data showing Los Angeles to have the highest smag content of any city in the U.S....yet no data can be found to show L.A. residents to be more prone to concer or any other airrelated illness than any other area.

A political plan to build another downtown bridge across
the Ohio River would bring more air pollution into Louisville
 The Lewis Compaign is not opposed to the proper use of
incineration for burning waste. However, incinerators
located in populated areas, such as Southwest Jefferson
County are bad news. Due to prevailing winds, fumes
would contaminate the air in the Southwest area and blow
across the rest of the county.

RICHARD LEWIS FOR CONGRESS

4140 Shelbyville Road, Suite 201 Louisville, Ky. 40207 (502)893-9614

"Debating Our Future"

CONSTITUTIONAL ABUSE HAS BECOME THE NORM

- * There is no mention of the separation of church and state in the Constitution. That comes from a statement by Hugo Black, who was largely responsible for banning prayer from schools. (c.1962)
- * Article VI of the Constitution states that the Constitution shall be the Supreme Law of the Land.
- * Not even the Supreme Court has the right to issue edicts with the force of law.

The Courts have no power to enforce orders which are challenged by the Executive or Legislative branches of our government. The Court has no power in the Constitution to decree that a woman has the right to abortion on demand.

* Congress has no power to make laws which apply to the states without state approval.

The powers of the United States are enumerated in the Constitution, Article I, Section 8.

The powers denied the states are listed in Article I, Section 10. The Tenth Amendment states "The powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively, OR TO THE PEOPLE."

Crime bills, gun control, abortion, national health care, ordering local taxes to be raised for federal purposes, are not among those listed in the enumerated powers.

* Federal district courts and courts of appeal were the creation of Congress, according to power stated in the Constitution. If Congress can create the courts, does it not follow that Congress can regulate the courts?

Cut taxes!
Downsize government!
Reduce the DEBT!

4140 Shelbyville Road, Suite 201 Louisville, Ky. 40207 (502)893-9614

"Debating Our Future"

THE DEBT IN PERSPECTIVE

Just what does the size of the national debt mean to you?

* The current national debt is approximately...

\$4,700,000,000,000 That's 4.7 TRILLION Dollars!

Just the interest on the national debt is approximately...

\$337,460,000,000 That's 337.46 BILLION Dollars!

* What does that mean in real terms?

\$924,547,945 a Day! That's 924.5 MILLION Dollars!

\$38,522,831 an Hour! That's 38.5 MILLION Dollars!

\$642,047 a Minute! That's 642.0 THOUSAND Dollars!

\$10,700 per Second!
That's 10.7 THOUSAND Dollars!

The third largest item in the federal budget is the interest on the national debt, and the interest on the DEBT doesn't pay for a single saltime cracker for a kid on welfare!

4.7 Trillion dollars is the most commonly quoted figure for the DEBT. An approximate .0718 percent of interest was calculated from the real figures for 1992 (Statistical Abstracts). The rest of the math you can check for yourself, if you choose.

And the folks in Washington are not even thinking about reducing the DEBTI They are bragging about reducing the deficit, which is the new debt we will have because the budget isn't balanced again this year!

Cut taxes!

Downsize government! Reduce the DEBT!

4140 Shelbyville Road, Suite 201 Louisville, Ky. 40207 (502)893-9614

"Debating Our Future"

OUR OVERWHELMING NATIONAL DEBT

Could you buy \$1.89 worth of groceries with each \$1.00 that you earn?

In 1992, the federal government paid out \$1.89 for every \$1.00 of taxes collected. Nothing has changed under Clinton that would reduce the debt!

Our country's debt is approximately \$5,000,000,000,000 - 5 trillion dollars!

In the Congressional Record for March 18, 1994, on page H1545, Congressman Gonzalez stated, "Just up until not too long ago, the Japanese had about 35 percent ownership of our Treasury, of our debt." (Emphasis added)

How can a foreign nation own part of our Treasury?

"The money will be worth one hundred cents on the dollar, because it is backed by the credit of the nation. It will represent a mortgage on all the homes and other property of all the people in the nation..."
(Congression Record - House, March 9, 1933, p.83. Emphasis added)

Since the Gold Reserve Act of January 15, 1934, the dollar has been on a trend of ever-decreasing real value. Must we back the bonds used to finance the deficit, then buy back our land before any American can truly own land or property?

"As a result of this, the ultimate ownership of all property is in the state; individual so-called 'ownership' is only by virtue of government, i.e., law, 'owner' amounting to mere user; and the use must be in accordance with law and subordinate to the necessities of the State."

(Senate Document #43, 1933)

THERE IS NO DEFICIT WHEN THE BUDGET IS BALANCED.
WHEN THE DEFICIT IS REDUCED, THE DEBT GOES UP!
THE BEST WAY TO REDUCE THE DEBT IS TO CUT SPENDING!

Cut taxes!
Downsize government!
Reduce the DEBT!

4140 Shelbyville Road, Suite 201 Louisville, Ky. 40207 (502)893-9614

"Debating Our Future"

SOCIALIZED HEALTH CARE IS THE PROBLEM!

Who pays the bill for health care?

- * 51% of this nation's health related costs are paid by taxpayers in support of government health plans.
- * 20% is paid by patients in cash co-payments.
- * Government already pays the majority because of this we do have a "health (finance) crisis"; not a health care crisis.
- * The only way insurance companies could guarantee the ability to pay our nation's health costs would be to buy government bonds (taxpayer debt).
- * If citizens are required to pay the interest on government bonds, forcing citizens to buy health insurance would be a form of double taxation.

For those who doubt the validity of the above statements, consider the following.

- * Insurance is an investment business.
- * There are no investment businesses which are immune from making bad loans or immune to market forces beyond their control.
- * Only government bonds (taxpayer debt) guarantee payment of initial investment with interest.

Health care reform, as proposed, is a sweet bond deal - unless you're a tax-payer!

Under the proposed Clinton plan, the American public would be forced to buy their own debt and pay the insurance companies a profit on it! Double taxation is unconstitutional.

Private Health Care has given us the world's BEST Health Care!
Cut taxes!

Downsize government!
Reduce the DEBT!

Our rights under the Bill Of Rights are being systematically violated. Our freedom of religion has been infringed upon. (There is nothing in the constitution about the separation of church and state.) Our right to keep and bear arms is being infringed upon. And the powers reserved to the states to make their own laws are being violated.

The Clinton Tax Bill Of 1993 has raised taxes on the middle class and people on Social Security. Our "Tax Free Day" is now July 3.

The federal government is far too big and intrusive to be at all efficient. It needs to be downsized, and it needs to be taken out of our private lives.

The national debt has risen from 19.5 billion in 1932 to more than 4.411 trillion dollars as of Fiscal Year 1993. The liberal controlled Congress has written a balanced budget only 6 times in the last 60 years! As Of Fy'93 the debt is 74% of our GNP! We owe \$3 of every \$4 being produced in our economy! IT'S TIME TO CUT SPENDING!

THERE IS NO DEFICIT WHEN THE BUDGET IS BALANCED.

THE CLINTON DEFICIT REDUCTION PLAN WILL STILL INCREASE THE DEBT AND TAXES.

THE WAY TO REDUCE THE DEBT IS TO CUT SPENDING!

LEWIS FOR CONGRESS 4140 SHELBYVILLE ROAD # 201 LOUISVILLE, KY. 40207 PHONE (502) 893-9614

DEBATING OUR FUTURE

OVERWHELMING NATIONAL DEBT

When will citizens (TAXPAYERS) recognize that they are in direct competition with their government for control of their economic destiny and their freedom?

Government has grown too large & Too expensive.

Representative John Boehner (R-OH) stated on the floor of the house in July that our "TAX FREE DAY" is now July 3rd: we work until July 3rd to pay our taxes -federal, state, local, and F.I.C.A. We are paying 53 % of our salaries in taxes!

Government (bureaucracy & Programs) now intrude into every aspect of our lives. For years the operating cost for these programs has been greater than the tax revenues collected resulting in federal debt now approaching 5 Trillion dollars!

Just paying the interest on this debt is now the <u>third largest federal</u> <u>expenditure</u>. It represents 14 % of our 1994 revenue.

Our government borrows money by offering (for sale) government bonds and securities. These bonds and securities obligate taxpayers to repay loans (principal with interest).

In 1987, our government relied on <u>foreign investors</u> to loan us <u>160</u> <u>billion dollars</u>. Our government had a 200 billion dollar deficit and Japan was purchasing about 40 % of our deficit bonds & securities.

Periodically investors get cold feet. Threats of (inflation) which is (the bane of the bond market) and competition with other countries offering higher interest on loans can make it difficult for America to borrow money. America must also compete with countries whose economies or currency may become a better risk at any time.

In the congressional record for March 18,1994, on page H1545, Congressman Gonzalez stated, "Just up to not to long ago, the Japanese had about 35 percent ownership of our treesury, of our debt." (emphasis added)

Again our government is out of control. It was intended to only have that authority that (we the people) grant it. Our forefathers intended for government to be our servant it is now our duty to stop it from becoming our master!

I ask for your support as your next congressman I will work to down size government, reduce taxes and end burdensome regulation.

I need your financial support in order to purchase signs, literature, stamps and for media cost. Donations of a dollar up to the legal limit of two thousand dollars will help win this campaign! Our campaign also needs your help with sign locations, phone banks and literature drops.

SINCERELY Buchard Semin

RICHARD LEWIS

"Debating Our Future"

OUR ECONOMIC PERIL

America is near economic collapse. This has been brought on by a corrupt, immoral government, elected officials who would not lead in the interest of being reelected.

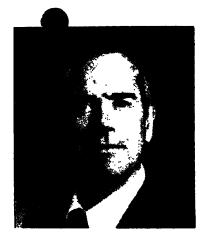

Many Americans who have been caught up in the partisan trap are now recognizing that partisan labels have not translated into fact.

America will soon face a credit crisis.

Just after World War II America was an economic giant. Almost 65% of the world's money supply was in U.S. dollars and America produced 44% of the world's products. We now produce less than 23% of the world's products. Demand for the dollar is falling off sharply! Creditors recognize developed country? that we can no longer justify 65% of the world's money supply in U.S. dollars.

Creditors also recognize that overspending no longer results in rapid growth in our economy. In 1963 every deficit dollar resulted in \$27 growth in our economy. By 1990, every deficit dollar resulted in less than 40 cents growth in our economy.

Creditors know our debt is becoming 12 trillion dollars of unfunded

obligations for Social Security, military retirement, government retirement, and other government programs. Americans also have huge personal and business debt, plus third world loans which have regularly threatened to default. This could bring down some of our largest commercial banks.

Government must be downsized! Living beyond our means is threatening our sovereignty! The GATT agreement is over 20,000 pages long. Has any member of Congress read it? The United States would have only 1 vote, and no veto, among 117 nations. The majority of these countries are lower developed nations. Is it reasonable to believe that L.D.C. (Lower Developed Countries) will write favorable agreements for the United States, or any

Every developed nation now has huge national debts! World leaders and chief executive officers of some of the world's largest multinational companies fear that a natural disaster, economic collapse. default of third world loans, could trigger a world-wide depression. Some leaders argue that it is time to end nation states in favor of one global government. Their philosophy is, "Who could default on debt obligations; unmangeable! In addition to national debt what would be the limit to credit or growth? approaching 5 trillion dollars, we have over Of course, these elitists have no regard for debt any nation's constitution or sovereignty!

> Cut taxes! Downsize government! Reduce the DEBT!

"Debating Our Future"

HEALTH CARE "GOALS"

The health care debate has been between the elite in the health care industry and our elected officials.

Representative government cannot work in an information vacuum!

The health care debate should have been between our elected officials and the public.

Facts driving reform, facts driving special interests did not want known must be provided to the public. Citizens must then be allowed time to consider the facts and debate solutions.

Citizens must realize that America's private health plan market is shrinking rapidly. Private health premiums now represent only 26% of America's health costs. Patients now pay 20% of the nation's health bill in cash. Tax supported government plans already pay 51% of our nation's health costs. Our government cannot afford the costs of increasing eligibility for these plans.

Our government borrows money through the sale of government bonds and securities. These bonds and securities obligate taxpayers to repay principal with interest. For the reason mentioned on the front page of this flyer, it is becoming difficult for the United

States to sell the bonds (borrow money) needed to fund the government!

Health care reform would provide 37,000,000 new policy premiums to a shrinking private health plan investment industry!

Investment can be a risky business. Health finance is an investment business.

It would not be reaonable for government to force (mandate) that citizens or business provide money to an investment business for the purpose of paying the nation's health bills, if that investor could lose money to bad investments.

Small investment losses would result in higher premiums; large losses could force us to pay for health care twice.

Government bonds and securities are the only guaranteed investments. Taxpayers are obligated to repay principal with interest.

Our government's health reform plan would force health plans to invest a large portion of premium retentions for every American citizen in government bonds and securities.

That means citizens and business would be forced to pay interest to our insurer or health plan for loaning our money to our government to float our national debt!

This reform would nationalize health care. It is unethical to call this "free enterprise".

It is ridiculous that our elected officials, who claim to represent you, and the news media, that is supposed to serve you, have not provided you with these facts!

Cut Taxes!
Downsize Government!
Reduce the DEBT!
